Duration	4 mins 53 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the middle of the list
b. In the right sublist ✓
c. In the left sublist
d. At the beginning of the list

Question **2**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By sorting the list first
b. By using a hash function
c. By comparing each element in the list sequentially ✓
d. By dividing the list into halves

Question **3**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O👎 ✓
b. O(log n)
c. O(1)
d. O(n log n)

Question **4**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Complexity

b. Selection

c. Bubble ✓

d. Insertion

Question **5**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Hash search

b. Both (1) & (3)

c. Binary search

d. Linear search ✓

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Dynamic search

b. Linear search ✓

c. Binary search

d. Hashing

Question **7**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(n log n)
b. O(log n)
c. O🥎
d. O(1) ✓

Question **8**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Hash search
b. Binary search
c. Interpolation search
d. Linear search ✓

Question **9**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Inserting elements into a list
b. Determining whether an element is present in a list ✓
c. Deleting elements from a list
d. Sorting elements in a list

Question **10**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

a. By comparing each element sequentially
b. By using a hash function
c. By dividing the list length by two ✓
d. By starting from the first element

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Skipping every second element
b. Sorting the list before searching
c. Checking each element sequentially ✓
d. Dividing the list in half repeatedly

Question **12**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the left sublist
b. The search ends successfully ✓
c. The search continues in the right sublist
d. The list is sorted

Question **13**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O(1)
b. O(log n) ✓
c. O👎
d. O(n log n)

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Quick search
b. Linear search ✓
c. Merge search
d. Bubble search

Question **15**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

- a. The search stops immediately ✓
- b. The search continues until the end of the list
- c. The search starts over from the beginning
- d. The search backtracks to find duplicate elements
